New York, NY

EXPERIENCE

Full Stack Coding, LLC | Instructor

(Sept. 2019 – Present)

- Instruct students in front-end fundamentals through HTML, CSS, and JavaScript.
- Teach Git and NPM essentials by helping up-and-coming coders build projects and follow best practices for commits and pull requests.

Open Source | Software Engineer

(Mar. 2019 – Present)

Have worked on the following projects, among others:

- **Shortly**: Site for a fictional URL shortening company. Main page contains a fully functional link shortener. ([Link to Source](#))
- **CageFlix**: Visual database of 80+ Nicolas Cage films. Users can apply filters like genre and decade to sort through films. Draws from internal JSON document to dynamically display trailer, poster, and synopsis for any selected movie. ([Source](#))
- **NewsFeed**: Displays up-to-date news stories in any user-selected category. Fetches data from News API with Axios. Clicking on a story displays modal with more details. ([Source](#))

Stack: React, JavaScript, Sass, HTML & CSS, Mobile-first design, RESTful APIs

My YingWenMing | UI Designer

(June 2016 – Aug. 2018)

- Created graphics and animations for company site and videos using Adobe Photoshop, After Effects, and Illustrator.
- Ensured visual consistency across site and video series
- Tested company site on mobile and desktop for breaking points and UI inconsistencies.

TECH STACK

React | Redux | JavaScript | HTML5 / CSS3 | Sass | Node.js | Express | Jest | Mocha & Chai
